Skin care sheet with UV care effect

Ultra-thin sheet formulated with beauty ingredients

A sheet, which is not visible and you don't even feel you have it on, consists of two layers; PU film and medicinal layer. Because it is possible to formulate it with UV absorbing agents and beauty ingredients, it is very useful for spot care and skin care after laser treatments. Also, it can be used for acne by formulating it with salicylic acid.

Proven safety for the skin

It is safe to use as its safety for the skin has been proven. It can be used for wide variety of purposes such as invisible and thin tape since it possible to be sold not only as a cosmetic product, but also as cosmetic tool.

7 microns thin skin care film

Thin enough to forget you have it on

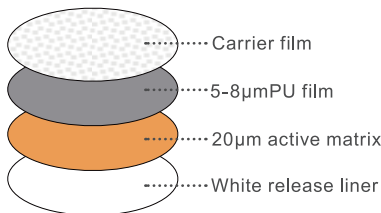

V-Skin is a mild skin care film that cares the skin while hiding spots and acne.

Intensive care for concerned parts anytime from the time you go out during the day to while you sleep.
